TIPS & MORE

Die cuts come in various sizes, ranging from 1" mini to 12" jumbo. The "minis" are numbered 373—386. The "jumbos" are numbered 395—516. All other die cuts are approximately 4-5" in size.

Some die cuts naturally fall into groups, so they are organized in that manner as much as possible. Look for groups such as Animals, Religious, or Geography (for example) on this list. However, the die cuts are numbered in the order by which they are shelved, and they are generally shelved by SIZE. Therefore the 4" hearts will not appear on this list right next to the mini hearts or the jumbo heart. The only way to be sure to find everything of a certain category is to review the whole list carefully. The list is not entirely alphabetical because it takes into account categorical groups and size groups.

Recent new additions will be added to the end of the list and labeled as "NEW." The entire list is updated approximately once a year.

Math-related die cuts such as geometric shapes, base 10 blocks, and fraction circles (for example) are in the numbered section 283—360.

A few of TRAC's die cuts are "clear cuts," meaning that they are made of clear acrylic instead of wood. This allows you to see through the die cut to accurately position paper that has text or images. These die cuts are identified as clear cuts on this list.

TRAC purchases die cuts from two companies, Accucut and Ellison. The company websites offer lots of educational and creative ideas for teachers:

www.accucut.com
www.ellison.com

TRAC also welcomes suggestions for future additions to our collection, but we cannot guarantee purchases.

Die cuts can cut much more than plain paper! Visit the company websites to view the various products available in their online stores: pop-up sponge sheets, adhesive metallic film, magnet sheets, cling vinyl, felt, polyfoam, plastic sheets, Shrinky Dinks plastic, chalkboard paper, and fabric. Go creative!

(TRAC recommends doing a die cut "test" of any unusual items before purchasing large quantities. Although these products are advertised to work with die cuts, TRAC does not guarantee results.)

TRAC is open to all KSU students, staff, and faculty. We also sell inexpensive memberships to members of the local community, giving them full access to this center and the campus library. Visit our website for membership details or call Dee Rule at 770-499-3670.

Go Owls!
