From College to Work: Let’s Have a Conversation

When you sign up for college, you sign up to cash in on a promise, a promise that your degree will change your trajectory, provide a measure of security and put you on the path to work you really want. For many, the reality is much different! Let's have a conversation about some of the real challenges you face as a college student as you prepare to transition from school to work. Join us for some creative brainstorming and a cool conversation about not just transitioning from college to work, but what's needed to facilitate a smooth and successful transition into more satisfying and engaging work. It's time for some practical solutions you can apply NOW.

Presented by
Robin Crawford, MA, LCC,
Work Life Strategist, Founder Design Your Best Work Life and KSU Instructor of Sociology
