## COLLEGE OF HUMANITIES & SOCIAL SCIENCES

### 8 - Fantastic Voyage: A Journey into the Human Mind (for psychology majors)

Behold the real final frontier, the human mind. From why we dream to ways we can improve our memories, psychology has helped us divine a map to the deepest reaches of our brains. Here are just a few of the questions that we'll explore in this learning community: Does subliminal advertising work? What exactly is an Oedipus complex, anyway? How accurate are eyewitnesses to crimes? Are intelligence tests biased? Is ecstasy really a 'safe' drug? Why does Jack Nicholson repeatedly lock the doors in "As Good as it Gets?" In this CLASS, we'll set a course for understanding the way humans think, learn and feel. And we'll set out to prove that psychology is not just fantasies and Freud.

### 15 – Why Math Will Rock Your World (for math and math education majors)

The name of this community comes from the cover of the January 23, 2006 issue of *Business Week*. From this article and others like it, it is apparent that the value of quantitative reasoning skills to business and industry, as well as education, is no longer a secret. Students completing a highly quantitative major like Mathematics or Mathematics Education are guaranteed to possess these skills upon graduation. This community is for students who have strong quantitative skills and those who see the importance of developing these skills.

### 17 – Me, Myself & College (for residential students)

For freshmen, the arrival at college signals both an achievement and a stressful transition. Virtually all students come with two objectives: to achieve academically and to succeed socially; for residential students, there may be additional considerations such as making new friends, living with roommates, learning how to relate to peers, and contributing to society. College provides a unique environment for the discovery and definition of self, fostering independence, freedom, and autonomy. This CLASS, designed for residential students, will explore these issues utilizing literature of the “self” and will create a collaborative learning environment between the individual and others through discussion and teamwork.

### 19 – Nice Daze & Disco Nights: The Social History and Popular Culture of the 1970s

As one of the most turbulent decades in American History, the 1970s also have an enduring legacy in the collective imagination of all Americans. Beyond the stereotypes—the leisure suits, the shag carpets, and the hair—the ‘70s represent an important period of social transition. This CLASS will consider the lows and highs of a decade that furthered the concept of the American dream even as Watergate and Vietnam threatened that dream. We’ll study the lasting popularity of ‘70s media—especially music, film, and television—as well as the influence the decade had upon our understanding of race, war, technology, and government.

### 21 – Why Wellness Works I

Do you want to know more about how you can become a successful student? If so, then join us as we look at the concept of “wellness.” Wellness refers to more than just the absence of disease or being physically fit. The wellness model focuses on self-responsibility and encompasses six different aspects: physical, occupational, emotional, social, intellectual, and spiritual. Each of the dimensions is separate, yet interrelated. Once students learn to achieve a good balance among the dimensions, they can function at their optimal level – an essential for becoming a successful student.

## 34 – Diversity in the Game of Life

"Duck... Duck... GOOSE!" You know the rules of this child's game. You're "safe" as long as you are tapped a "duck." If you become the "goose," you end up running around in circles. Sure, this is just a child's game, but similar things happen in the game of life. People get labeled, are treated differently based on that label, and often times have to search for safety. All of us at one time or another have been the goose and the duck. And, whether we'd like to admit it or not, we've probably all done our fair share of tapping as well. In this CLASS you learn to examine your own and others' beliefs and attitudes about different people. Yes, this CLASS will challenge you. But in the end, you will undoubtedly have a better understanding of yourself and of other people, an understanding that will not only help you in college but in life as well.

### 40 - My Big, Fat, Greek Learning Community

What do Brad Pitt and Jennifer Aniston have in common? Probably not so much these days, but he did play a Greek (Achilles) in the film *Troy*, and her last name is a shortened version of the very Greek name Anastasakis. But there are so many more famous Greeks, such as Plato, Aristotle, and Alexander the Great. My Big Fat Greek Learning Community will explore the influence Greek thought and culture has had on western society, focusing on connections between Greek antiquity and the contemporary world in the areas of art, philosophy, literature, education and technology.

## HONORS

### 45 – Exploring Myth and Philosophy (for honors students)

This learning community will examine the divergences and convergences between two forms of human understanding: myth and philosophy. In PHIL 2200, students will study representative texts from the Greek, European, and Chinese cultures, whose devotees have used both myth and philosophy to understand themselves, each other, and the world. In ENGL 1101, students will analyze others' written and visual arguments and construct their own (with attention to logic, coherence, audience, and credible supporting evidence) and, at term's end, will write about the mythologizing of a historical event in the first five years of their lives as they explore the mythic and philosophical dimensions of *The Lord of the Rings* film trilogy.
