# Hackathon 2018

Please note that this event took place in 2018. Visit the [most recent Hackathon event webpage](#).

The CCSE Hackathon is CCSE's premier event in showcasing student talent and connecting companies to our students. Through dedicated "threads" (aka themes) within the event, companies can raise awareness of opportunities for students to work with them, increase brand awareness, and locate top talent for computing workforce. Students can hone their skills, apply the knowledge they gain inside the classroom in authentic, real-world problems, and connect with internship and job opportunities.

This year's Hackathon theme is "**Technology in 2030**".

The Hackathon is open to **all undergraduate and graduate** CCSE (ACS, BASIT, IT, CS, SWE, CGDD and PhD in Data Science and Analytics) students.
