

NASA's **MIKE RICCIO**

Marietta Campus
Wednesday 1/28/26
Engineering Technology Bldg.
Q -202 1:00pm - 2:30 pm
Q&A Session in lobby
afterwards until 3:00pm

Join us for a dynamic seminar featuring **Mike Riccio** from **NASA's Technology Transfer Office**. Discover how NASA's cutting-edge innovations are fueling real-world solutions here on Earth. Learn how entrepreneurs and startups can leverage NASA's vast portfolio of patents and software—many available at low or no cost—to power their next big idea.

From space-age materials to breakthrough robotics and AI technologies, this talk will explore how NASA's mission-driven research is now driving commercial success across industries. Don't miss this opportunity to ignite your venture with technology that's truly out of this world!
