

# how HOMES get built

(and the careers behind them)

**MARCH 23, 3-4PM**

**iStem Building Room 2413**

*(Next to Marietta ENTR Center)*

Production Homebuilding is a complex system. Design, construction, finance, scheduling, and operations all have to work together for a home to be completed successfully. Join us to learn how that system works and where industries fit into it.

**Austin Brown** from **Davidson Homes** will discuss the roles involved in building homes. Based on real-world experience, we'll learn of the cross-collaboration required to build a home, plus skills and lessons learned from working inside a large homebuilding organization.

**RSVP**

**KENNESAW STATE  
UNIVERSITY**
