

Aashima Gupta serves as the Global Director of the Healthcare Vertical at Google Cloud and leads the strategy and solutions for the healthcare industry. She has extensive experience in developing and executing global strategies, leading cross-functional teams, and fostering strategic partnerships. Aashima founded the vertical and drove significant growth in Google Cloud's healthcare business by securing key partnerships and delivering impactful solutions. She serves on the joint steer comm of Ascension Health, Mayo Clinic and HCA. Before joining Google Cloud, Aashima founded and led the Healthcare Vertical and interoperability initiatives at Apigee, advocating for Open Data and the use of APIs to overcome healthcare data silos. Previously, at Kaiser Permanente, she oversaw digital health incubations, spearheading innovations in chronic condition management, including collaborations with EPIC and integrations with workflows. Aashima holds two patents in computer science and remains passionate about leveraging technology to improve patient care and advance healthcare accessibility.
