

## Todd C. Sharp

Head of Strategy and Transformation,  
Area Principal  
HCLS Solution Management Leadership Team  
AWS – Amazon Web Services

As a leader focused on Solution Management for Healthcare & Life Science (HCLS) Strategy & Transformation, Todd serves customers and colleagues as an executive advisor and advocate for HCLS organizations. Todd works across industry including initiatives with payors, providers, health systems, clinical research, life sciences, medical device, related agencies, technology, supply chain, and service companies.

With an extensive digital innovation, clinical research, software development, security, machine learning, and healthcare background from 'boots on the ground' to global policy creation across some of the world's most visible and admired organizations over two decades, Todd has served the community in roles including being an Adjunct with Emory University's Graduate Big Data and Analytics program, in-hospital on the front lines of the pandemic in functional CISO and CIO roles, as a trained EMT/WFA in the field, and has worked extensively within top pediatric (NIH ranked), rural community, refugee response (UN), national security (USDoD) and public sector clinical, research, revenue cycle operations as well as within global research initiatives.

Todd holds Bachelor and Masters degrees from the Georgia Institute of Technology (Georgia Tech), has a decade and a half of cloud expertise, and nearly three decades of software and complex systems development.
