

Trushar Dungarani, DO, SFHM - BIO

Director of Clinical & Data Science, MDClone

Trushar Dungarani is a solution-driven physician leader with a passion for leveraging data and technology to transform healthcare to improve patient care and reduce clinical burnout. As the Director of Clinical & Data Science for MDClone, his team leads data strategy/quality, implementation and training efforts in order to combine technology, governance, and a partnership that helps provider organizations unlock new potential from their data and empowers front-line users to access and act on their ideas.

With over a decade of experience in patient care, clinical operations, healthcare innovation, insurance regulation and clinical decision support implementation, Dr. Dungarani has successfully implemented high-value care models at top health systems, including Johns Hopkins. His work has led to significant cost savings, improved clinical workflows, and enhanced patient safety. He actively mentors health systems through quality improvement projects and serves on the National Patient Safety/Quality Improvement Committee for the Society of Hospital Medicine.

Dr. Dungarani is board-certified in Internal Medicine and his clinical practice now includes part-time hospitalist work at Emory Healthcare, ensuring he stays connected to bedside care.
