<b>Department:</b>	Elementary and Early Childhood Education
<b>Program:</b>	Elementary Education, BS

**Program Student Learning Outcomes**

Upon completion of this degree from KSU, candidates will be able to:

- Apply knowledge and understanding of state and national standards to instructional practices.
- Demonstrate knowledge of and ability to use research and theories to inform content area instruction in elementary education.
- Demonstrate knowledge of the characteristics of dyslexia, and other related disorders, and competence in the use of evidence-based interventions in elementary education.
- Demonstrate understanding of the content knowledge requisite for supporting students' learning in the content areas, including Literacy, Mathematics, Social Studies, Science, Health and Physical Education, and the Arts.
- Plan for differentiated learning experiences that attend to varying stages of language development, abilities, achievement, interests, and personal/cultural/community assets.
- Systematically gather, analyze, and utilize relevant data to measure student progress, inform instructional content and delivery methods, and provide timely and constructive feedback.
- Use primary and secondary source materials to deliver the lessons to elementary students, thereby providing information beyond the classroom text/s.
- Demonstrate entry-level preparedness of teaching in the elementary classroom as measured by the Georgia Candidate Assessment on Performance Standards (CAPS).
- Demonstrate the appropriate professional behaviors and dispositions necessary for working effectively and collaboratively with all stakeholders, including students, parents, administrators, colleagues, and community members.
- Integrate technology to support instruction, assessment, and student learning.
