Program:	Elementary & Early Childhood Education, MEd

Program Student Learning Outcomes

Upon completion of this degree from KSU, candidates will be able to:

- Apply their knowledge of the social, historical, and political nature of teaching to examine issues related to race, ethnicity, sex, gender, ability, language, socio-economic factors, and other aspects of intersectional identities that impact this process.
- Use the principles of asset-based pedagogies to explore diverse cultural identities and to analyze related social, historical, and political issues impacting education.
- Examine critical issues and challenges in early childhood and elementary education using knowledge of disciplinary theories, creative inquiry, innovation, and evidenced-driven research.
- Reflect critically upon data as part of a recursive process when planning, implementing, and assessing evidence of effective teaching, learning, and development.
- Apply their knowledge of student learning styles to cultivate partnership environments and methods of support with students and families.
- Evaluate and select ethical educational resources, and scholarly research for accuracy, validity, and varied social and cultural contexts.
- Use evidence-based, discipline-specific knowledge and pedagogy to facilitate inquiry that supports learning for all.
- Identify a critical educational issue and communicate knowledge of the issue and topic through effective writing and digital communication.
