

**Program Information**

<b>College:</b>	College of Computing and Software Engineering
<b>Department:</b>	Software Engineering and Game Development
<b>Program:</b>	Software Engineering, MSSWE

**Program Student Learning Outcomes**

After completing the MS in Software Engineering program, students will be able to:

- Use software processes, software architecture or models, and the mapping of underlying techniques into the problem domain.
- Analyze, assess, verify and validate, and evaluate artifacts of software engineering systems.
- Apply research skills to independently research new topics in software engineering.
