

The Lemelson Foundation

EQUINOX SUMMIT

The 7th Annual EQUINOX SUMMIT is set to illuminate the critical issues of food and water insecurity with a theme deeply rooted in disruption. Building upon the success of previous symposiums, this year's event aims to showcase successful frameworks that have proven effective in addressing the challenges faced by communities worldwide. The focus on disruption underscores the need for innovative solutions and transformative approaches to tackle the pressing issues of food and water insecurity. As a multi-sponsored platform, the annual EQUINOX: SDGs continues to serve as a nexus for interdisciplinary collaboration, bringing together diverse voices from institutions of higher education, professionals, policymakers, stakeholders, community members, and advocates. Join us as we explore and celebrate impactful strategies that drive positive change and sustainable development in the face of challenges within food and water systems.
