

**Instructions**

The Kennesaw State University (KSU) Air Quality Permit requires us to verify that all diesel fuel used on campus has a maximum sulfur content of 15 ppm (0.0015% by weight) and a minimum CETANE Index of 40 or maximum aromatic content of 35%. The permit also requires the university to maintain records of the operating hours and fuel usage of generators. To meet these requirements owners of portable generators must certify that the fuel used on the generator (if diesel) meets these conditions and maintain operating records of the generator. This form, therefore, must be completed and signed by the owner/operator for each portable generator brought on campus.

**Section A: General Information**

Make		Model	
Rating (Kw/HP)		Fuel Type	

**Section B: Owner/Operator Information**

Company Name	
Company Address	
Operator Name	
Operator Signature	

**Section C: Owner/Operator Certification**

By signing this form, I verify that sulfur content of fuel used is $\leq$ 0.0015% (15ppm) and that CETANE Index $\geq$ 40 or that aromatic content $\leq$ 35%.	Name	
	Signature
