

Student Volunteerism & Service

Strategic Operating Plan Infographic

VISION

To create a more compassionate and equitable world by meeting community needs with student ability through volunteerism and service.

MISSION

To facilitate intentional service experiences that promote positive stewardship of our community and develop students as engaged, responsible citizens.

DOMAINS

By actively working to ensure that our staff functions at the highest capacity and is properly supported, SVS will be able to drastically amplify both student and staff capacity to build a better community for all.

Developing an array of diverse, equitable, and inclusive programming, which challenges students to make a positive impact on their community, will support the department's efforts to promote the development of students.

In support of the growth of departmental initiatives and student involvement in the community, the department will steward donor relationships with individuals and corporations.

Shore up support for service-learning in order to institutionalize compliance with Carnegie Elective Classification on Community Engagement measures.

Building and sustaining collaborative community partnerships will strengthen the department and University's relationship with Cobb County and the surrounding metro Atlanta region.

Building a data and assessment-driven department will create a dynamic environment for the strategic plan outlined above to support continuous growth in student belonging and impact at Kennesaw State University.
